

Wittingslow Amusements Australia

Profit Share

As the cost of hiring the rides outright can be an expensive way to run your event, especially if you have bad weather, we can offer an alternative with profit sharing where we take the risk.

We offer 50% of the total net takings to the school. This is based on the sales of the pre-sold unlimited ride wristbands and the tickets sold on the day. If your sales do not reach the value of your package, there is no cost to you, but you will not receive any revenue. If your package value is reached you will receive 50% of all money over and above that total. The packages are worked out according to difference enrolments at your school (see samples below). We work with some realistic guidelines to help you make appropriate ride selection for the number of enrolments.

Sample Packages
